4 - CHARACTERISTICS OF DEVELOPMENT

ALWAYS DEPRESS THE CLEAR TABLE BUTTON FIRST. You then have two options for entering information about the scheme: EITHER enter information for up to 20 dwelling types—each row must be either fully complete or left blank (enter 1 if information not relevant e.g. size of affordable unit but is a market unit)—OR select the default mix by depressing the "Use Default Mix" button.

Build costs in the toolkit are driven by the square meterage entered on this page. For houses the unit size will normally be the same for both gross and nett internal area. For flats you will need to increase unit sizes to take into account communal areas such as hallways, landings and stairs. Each scheme is different, and site-specific information should be sought. Where no information on sq meterage of communal areas is available the following factors can be applied: +15% for 1-5 storeys, +20% for 6-15 storeys, and +25% for 16 or more storeys.
